

AQUATRACTAN-S

An efficient attractant for penaeid shrimp

PROPERTIES

- **AQUATRACTAN S** is an attractant, appetite stimulator, flavor enhancer for aquatic feed and fish. Its formula includes various ingredients recognized for their impact plus aromatic flavor with direct impact and positive "memorization" of the aromatic signal at brain level. This creates a true recognition and loyalty of the animal to the feed.
- Chemical "signal" is first needed to ignite the sequence of feed behavior: recognition, ingestion, swallowing.
- **AQUATRACTAN S** water soluble tastes and smells act directly through Chemoreception by receptors cells and insure fast location and rapid ingestion and then stimulate the appetite for complete consumption of the daily feeding ration.

AQUATRACTAN S

- Increase feed attractability and location.
- Reduce the level of uneaten or wasted feed, resulting in improved feed conversion and water quality.
- Increase eating behavior and appetite to insure ration consumption.

COMPOSITION

- Concentrate of yeast protein with amino acids and peptides
- Nucleotides
- Betain
- Selected natural flavoring substances especially selected for their powers of recognition and "addiction".

USE AND PRESENTATION

- Fine powder with meat smell
- Incorporation : 1 kg per ton of feed.
- Conservation : 1 year in original closed packaging in dry environment.
- Packaging : 25 kg bags.
