

HEPATOFISH

Fish liver & digestive functions support

PROPERTIES

- Intensive feeding could have detrimental actions on fish liver, flesh quality and fat accumulation. HEPATOFISH enables better fat metabolism through its innovative and concentrated formulation of powerful ingredients :

SORBITOL

- Cholagogue functions
- Stimulation of hormones and digestive enzymes secretions

CHOLINE INOSITOL

- Lipotropic factors
- Improves conversion of liver fats into phospholipids
- Limits fatty overload

METHIONINE

VITAMIN E VITAMIN C

- Stimulation of immune responses
- Increased stress resistance (caused by transport, temperatures...)

COMPOSITION (per kg of product)

Sorbitol :	40 000 mg	Vitamin C :	20 000 mg
Methionine :	2%	Vitamin E :	800 mg
Inositol :	36 000 mg		
Lysine :	0.4%		
Choline chloride :	108 000 mg		

USE AND PRESENTATION

- Mix 2.5 g HEPATOFISH per kg of feed or meal and then coat with TECH-OIL or with a good quality fish oil. We recommend a daily use of HEPATOFISH for a one week period, every month.
- Mix the product with water, apply to pellets and coat with fish oil.
- HEPATOFISH is presented in powder form.
- Store in a cool dry place
