

IMMUTECH S/F

*To improve shrimp and fish health
and stress resistance*

PROPERTIES

- In spite of a farmer's skills, fish and shrimp are often subject to stressful conditions during rearing. These conditions (poor soil conditions, pollution, oxygen depletion, high or low temperature, sorting and transfer, salinity shock, pathogen outbreaks) may cause direct mortality or secondary infection by pathogens.
- IMMUTECH S/F helps to prevent stress or/and aid recovery after a stress.
- IMMUTECH S/F will reduce mortality risks

β glucane
and Manno-
Oligosaccharides (MOS)

- Immunostimulation: Activation of phagocyte cells (non specific immune system)
- Improve resistance against bacterial and viral infections
- Proved strong enhancement of resistance to infection.

Vitamin E
Vitamin C

- Stimulation of immune responses.
- Increased stress resistance.
- All vitamin C used in the composition of the IMMUTECH S/F is thermo stable and could be used in feed extruders without loss.

Selenium

- Antioxidant properties : limits the effect of free radicals.
- Enzymatic activity stimulation.

COMPOSITION (per kg of product)

20%: Manno-oligosaccharids (MOS): 10% and beta glucans:
10 % (from yeast cells *Saccharomyces cerevisiae*)

Vitamin E : 29 000 mg
Vitamin C : 64 000 mg
Selenium : 142 mg

Does not contain antibiotics and is environment friendly

USE AND PRESENTATION

- Per 1 kg of feed: Mix 7g IMMUTECH S/F per 50 or 100 ml of clean water (not needed for fish), mix with the feed or meal, wait absorption and then coat with TECH-OIL or with a good quality fish oil. Use this preparation immediately. We recommend a daily use of IMMUTECH S/F during one week, before anticipated stress, and after stressfull periods.
- IMMUTECH S/F is presented in powder form.
- Store in a dry and cool place.
