

STRESSCONTROL

Direct biological care to improve shrimp, fish health and stress resistance

PROPERTIES

- In spite of an aqua farmer's experience, fish and shrimp are often subject to stressful conditions during rearing. These conditions (poor soil conditions, pollution, oxygen depletion, high or low temperature, sorting and transfer, salinity shock, pathogen outbreaks) may cause direct mortality or secondary infection by pathogens.
- **STRESSCONTROL** helps to prevent consequences of stress or/and aid recovery after a stress.
- **STRESSCONTROL** will reduce mortality risks

β glucane
and Manno-
Oligosaccharides (MOS)

- Immunostimulation: activation of phagocyte cells (non specific immune system)
- Improve resistance against bacterial and viral infections
- Proved strong enhancement of resistance to infection.

Vitamin E
Vitamin C

- Stimulation of immune responses.
- Increased stress resistance.
- All vitamin C used in the composition of **STRESSCONTROL** is thermo stable.

Aromatic substances
and vegetal extracts

- Prebiotic activity: selection of favorable and non pathogen strains of bacteria in the gut flora.

COMPOSITION (per kg of product)

Aromatic substances, manno-oligosaccharids and beta glucans, vegetal extracts

Vitamin C : 1000 mg
Vitamin E : 400 mg

Does not contain antibiotics and is environment friendly

USE AND PRESENTATION

- **STRESSCONTROL** is an extruded pellet to replace standard diet during stressful period.
- A daily use of **STRESSCONTROL** is recommended during 1 to 3 weeks before anticipated stress, during and after stressful periods.
- **STRESSCONTROL** replace the standard diet with the same ratio.
- **STRESSCONTROL** exists under all suitable sizes (crumbles-1-2-3-4-5-6-8 mm), for different species with specific formula.
- Store in a dry and cool place.
