

# ECONOMIX S

## The Fish meal reducer

### PROPERTIES

- *Fish meal* is today the major cost in aquafeed. Its prices increase year after year... How decrease fish meal without risk, reach ideal protein and save money on your feed ?

By using **ECONOMIX !**

- **ECONOMIX** is an original feed additive composed of essential elements :

#### Protease complex

- A specific fermentation product for fish and crustaceans nutrition.
- Works on all types of protein vegetable substrates
- Stable at high pelleting and expanding temperature

#### Amino acids

- Supply of totally digestible essential amino acids
  - methionin, lysine, threonin

#### Attractants

- Ability to stimulate the olfactory bulb of fish.
- Enhance feed intake.

- **ECONOMIX** works in different way :

#### Top feeding

- ✓ improve feed intake
- ✓ increase digestible amino acids of the feed

#### Substitute Fish meal

- ✓ **ECONOMIX** can spare 2% of fishmeal.
- ✓ Variability of Aquafeed values is reduced
- ✓ Reduce feed cost while maintaining performances

#### Use new

- ✓ **ECONOMIX** maintain performance when introducing secondary raw materials meals like *palm*, *coton* or *rapes* meal

### USE AND PRESENTATION

- **ECONOMIX** is presented in powder form
- Recommended incorporation rate: **2 kg ECONOMIX per ton of feed**
- Formulation study of **ECONOMIX** way of use is possible on request
- Store in a cool dry place

### The protein saver

	Feed cost (USD/t)	Crude diet protein	Valorised diet protein	Economix
Control	926	48	48	0
Economix	921	47	48	0,2 %

↓

**- 5 USD / Ton**

### The fish meal reducer

	Feed cost (USD/t)	Crude diet protein	Fish Meal	Economix
Control	926	48	25	0
Economix	914	48	23	0,2 %

↓

**- 12 USD / Ton**

*You maintain or improve nutritional values of your feed, but you decrease feed cost !*
