

FMR-F

AQU009

Protein concentrate with vitamins, minerals, attractants, growth and health promoters

PROPERTIES

FMR-F is a protein concentrate able to replace the same quantity of fish meal and permitting a further replacement of 2 % of fish meal by 2% vegetable protein source therefore reducing the incorporation of fish meal by 3 to 5 %

VITAMINS & OLIGO

- FMR-F includes all required **minerals** and **vitamins** for the growth of fish. No further addition of other vitamins and minerals premix is needed.
- All vitamin C used in the composition of the **FMR-F** is thermo stable and can be used in feed extruder without loss.

NUCLEOTIDES

- FMR-F contains growth and immune stimulators such as **nucleotides**.

AMINO ACIDS HEPATO PROTECTOR

- FMR-F includes **essential amino acids** to compensate for the lack of essential amino acids in vegetable proteins
- FMR-F contains **hepato-protector** to permit the use for high fat content feed.

ATTRACTANTS

- FMR-F contains **powerful attractants** to increase feed consumption in the case of an all vegetable feed,
- FMR-F permits better attractability, palatability and feed efficiency.

USE AND PRESENTATION

- FMR-F is presented as a fine powder to be incorporated like a premix before the granulation process.
- Recommended incorporation rates:

• For extensive farming and herbivorous species (carps, tilapia):	1 %
• For semi intensive farming in earth ponds (carps, tilapia)	2 %
• For intensive farming of carnivorous species (sea bass, <i>Pangasius spp.</i> , <i>Clarias spp.</i> ...)	3 %
- Store in a cool dry place.
