

# HEPATOFISH

AQU006

## Fish liver & digestive functions support

### PROPERTIES

- Intensive feeding could have detrimental actions on fish liver, flesh quality and fat accumulation. **HEPATOFISH** enables better fat metabolism through its innovative and concentrated formulation of powerful ingredients :

#### SORBITOL

- Cholagogue functions
- Stimulation of and digestive enzymes secretions

#### CHOLINE INOSITOL

- Lipotropic factors
- Improves conversion of liver fats into phospholipids
- Limits fatty overload

#### METHIONINE LYSINE

#### Prebiotic vegetable substract

- Growth and regulation of the suitable intestinal flora to reduce the opportunities for the pathogenic agent entrance

### USE AND PRESENTATION

- Recommended incorporation rate: **2.5 kg HEPATOFISH per ton of feed**
- **For coating in farm**, mix the product with water, apply to pellets and coat with a good quality fish oil..
- We recommend a daily use of **HEPATOFISH** for a one week period, every month.
- Mix the product with water, apply to pellets and coat with fish oil.
- **HEPATOFISH** is presented in powder form.
- Store in a cool dry place
