

OXITECH

AQU019

A very efficient ethoxyquine free antioxidant for aqua feed

PROPERTIES

- OXITECH is a highly efficient antioxidative mixture to stabilize prepared or edible fats and oils, highly susceptible to auto-oxidation in aquaculture feed.
- OXYTECH is only composed with authorized human feed additives and avoid the risk of prohibited residues in the flesh of the fish or shrimps

Avantages

of OXITECH

- Prevents rancidity.
- Controls oxidation.
- Extends feed storage life.
- Prevents quality loss and has a positive impact on feed consumption, growth and feed conversion ratio.
- Ethoxyquine free

COMPOSITION

- Active ingredients:
 - 10% BHA,
 - 10% propyl gallate
 - 10% citric acid.
- pH of the 5% solution : 2.0 – 3.0

USE AND PRESENTATION

- Grey powder with a density : 0.700 – 0.850 g/ml
- Compatibility : compatible with all ingredients in animal feed and pet food.
- Recommended incorporation rate:
 - to preserve oil use at a minimum rate of 250 g/ton of oil.
 - For aquaculture feed in tropical countries: incorporate at a rate of 500 to 1000 g/ton before processing.
- Stability : stable for two years.
- Storage : should be stored in a dark and cool dry place
