

PREMIX STRESSCONTROL

FXT002NE

Premix for aquafeed to improve shrimp, fish health and stress resistance

PROPERTIES

- In spite of a farmer's skills, fish and shrimp are often subject to stressful conditions during rearing. These conditions (poor soil conditions, pollution, oxygen depletion, high or low temperature, sorting and transfer, salinity shock, pathogen outbreaks) may cause direct mortality or secondary infection by pathogens.
- PREMIX STRESSCONTROL is a specific vitamins and trace elements premix supplemented with immunostimulant to prepare a special aquafeed to prevent consequences of stress or/and aid recovery after a stress.
- PREMIX STRESSCONTROL will reduce mortality risks

β glucane
and Manno-
Oligosaccharides (MOS)

- Improve the resistance against pathogen agents by the: activation of phagocyte cells (non specific immune system)
- Improve resistance against bacterial and viral infections
- Proved strong enhancement of resistance to infection.

Vitamin E
Vitamin C

- Stimulation of immune responses.
- Increased stress resistance.
- All vitamin C used in the composition of STRESSCONTROL is thermo stable.

Aromatical substances
and vegetal extracts

- Prebiotic activity. Selection of favourable and non pathogen strains of bacteria in the gut flora.

USE AND PRESENTATION

- Mix 20 kg PREMIX STRESSCONTROL per ton of meal mix before pelleting.
- Store PREMIX STRESSCONTROL in a dry and cool place
