

VITASHRIMP, VITATECH-S+ and VITATECH-S

AQU024, AQU01 and AQU004

A well balanced vitamins & trace elements premixes for shrimp

PROPERTIES

- VITASHRIMP, VITATECH-S+ and VITATECH-S are original premixes of vitamins and trace elements designed to best meet the specific needs of farmed shrimps
- VITASHRIMP is also a vitamin and mineral blend which should be used in the manufacturing of **industrial** or **home-made fish feed** in adjunction to local ingredients.
- VITATECH-S+ is also a vitamin and mineral blend which should be used in the manufacturing of **industrial** or **home-made fish feed** in adjunction to local ingredients.
- All the vitamin C used in the composition of VITASHRIMP and VITATECH-S+ is thermo stable and could be used in feed extruders without loss.
- VITATECH-S is an original blend of vitamins and trace elements designed to compensate for imperfections and deterioration in feed composition due to poor stocking conditions, poor quality raw materials, poor formulation and its detrimental effect on bio availability of essential elements. VITATECH-S should be used in the manufacturing of **home-made aquaculture feed** in adjunction to local ingredients.
- All the vitamin C used in the composition of VITASHRIMP and VITATECH S+ is thermo stable and could be used in feed extruders without loss.
- VITASHRIMP, VITATECH-S+ and VITATECH-S have a direct effect on:
 - Growing performance
 - Survival rate

USE AND PRESENTATION

- Recommended incorporation rate: 5-10 kg VITASHRIMP or VITATECH-S+ per ton of meal **mixture before pelleting.**
- Mix 10 g VITATECH-S per kilo of feed with 50/100 ml of clean water, then mix with the pellet, wait the liquid absorption and then coat with a good quality fish oil. Use this prepared feed immediately. We recommend a daily use of VITATECH-S.
- Store VITATECH-S in a dry and cool place
- Store VITASHRIMP in a dry and cool place
